### **3. Services Area:**

As a software development service provider, WEBEE TECHNOLOGY strives to provide quality services and products that help to remain in step with our competitors. Along with this, we use modern software development platforms, methodology, tools & technology as well as employ the latest project management techniques and software engineering practices. Using structured methodologies and proven IT processes helps to reduce complexity, risks and costs efficiency. We assist our customers to develop custom software applications and help them throughout the entire Software Development Life Cycle including Project Management, System Analysis and Design, Development, Implementation, Training and future Maintenance. In a nutshell, our strong technical team can ensure the software development services we provide to fit any **Government, Semi-Government, Non-Government and any Business** organization to meet their expectations.

#### **Services at a glance:**

1. Software Development
2. Web Apps Development
3. Mobile Apps Development
4. Hardware Automation
5. Cloud Server Management
6. IT Consultancy
7. Software Migration

#### **Software Development**

WEBEE TECHNOLOGY is strongly focused on creating customer oriented software applications. The development team minutely examines and analyses the existing IT processes of the clients. It does the gap analysis to ensure complete compatibility between existing system and custom developed application. The applications are designed, tested and deployed to complete satisfaction of the clients. We have expertise in the followings:

1. Custom Application Development
2. Application Re-Engineering
3. Enterprise Level Software Development
4. Application Extension and Up-Gradation to make it more scalable for future needs
5. Client - Server Application Development
6. SaaS Based Application
7. Standalone Cloud Application
8. Standalone Desktop Application

#### **Web Apps Development:**

We are very experienced in custom web application development providing high quality and cost effective web development services using latest technologies - PHP, ASP.net, JavaScript, JQuery, Ajax, CSS, HTML etc. Our web development services are tailored

specifically to meet client's requirements and business objectives of the customers. We have experience of delivering high performance web applications with complex functionalities and have achieved commercial success.

Our web development services enable any Govt. Semi-Govt., NGO and other Business organizations to reduce time to market, get closer to the customers and achieve long-term profitable growth. We can help the clients to become web connected by providing solutions like-

1. Internet strategy development
2. Web enable legacy applications
3. E-Business development
4. E-Commerce development
5. Informative web site design and development
6. Internet based solutions
7. Portal development
8. Community site development
9. Specialized custom applications for supply chain management, network management, business process management etc.

### **Mobile Apps Development**

Today's digital transformation, WEBEE TECHNOLOGY is very much concerned about customer behavior oriented device driven application development. Now a days, mobile is the important platform to accelerating human activities. So, our every solution has a mobile app version to connect our client to their office. We have expertise in the following mobile app development:

1. Android App Development
2. IOS App Development
3. App Re-Engineering
4. SaaS Based Mobile App

### **Hardware Automation:**

Our innovative engineering team helps to retain the know-how in your legacy manual hardware and machinery and integrate to the latest software system. So the performance of the hardware or machinery counts faster output. Whether the hardware is network device or medical equipment, WEBEE TECHNOLOGY is capable of integrating them. Example of our hardware integration area:

1. Hospital Bio-chemistry machinery: We collect data from the machine to a software system and then filter and synchronize to database server.
2. Hospital Optometry Machinery: We collect data from the machine to a software system and then filter and synchronize to database server.
3. Fuel Pump Dispenser Machinery: We collect data from the machine to a software system and then filter and synchronize to database server.

### **Software Migration:**

Our Software Application Migration services help retain the know-how in your legacy applications and at the same time leverage on the performance potential of latest technologies. Whether the development tool set is at the desktop or on the Internet, WEBEE TECHNOLOGY is capable of developing and implementing software application migration or application porting projects. We perform migration or re-engineering of applications from existing platforms to newer ones and from older legacy technologies to newer open technologies.

Our migration methodology:

1. Integrates Legacy Systems and new Internet driven technologies.
2. Migration of systems and business logic to new architectures, languages and web-based environments.
3. Ensures systems quality and stability.
4. Replace a legacy system, moving the data from the legacy application to the new application while preserving data integrity.
5. Consolidate legacy systems eliminating duplication by moving data and functionality from various systems to a smaller number of systems.

## **4. We use cutting edge technologies:**

The modern business or any work flow is completely Internet driven and stiff online competition makes it mandatory for every business to devise its strategy. Offshore application development brings in the much needed vibrancy in a business or an organization so that they can enjoy competitive edge and push up the ROI graph. WEBEE TECHNOLOGY provides cutting-edge custom application development in India through its offshore development center so that its global clientele can reap the benefits of robust, scalable, cost-effective and customized software applications.

1. **Open Source:** LAMP (Linux, Apache, MySQL, PHP), HTML, CSS, JavaScript, JQuery etc.
2. **Microsoft Platform:** C#, Dot NET (.Net) Technologies, SQL Server, SQL Server Reporting Service, Crystal Report, WCF, MVC etc.
3. **Mobile App:** ReactNative, Java, Objective C etc.

## **5. Advantages**

WEBEE TECHNOLOGY offers its clients the outsourcing benefits that drastically reduce the costs of custom application development. The clients stand to gain from their business association with WEBEE TECHNOLOGY because of the following reasons.

1. State-of-the-art ODC that provides custom applications at very competitive pricing.

2. Flexible hiring options that suits the project and budget needs of the clients.
3. Increased client in software application development for better results.
4. Round-the-clock application maintenance services.
5. Provides latest technology so that clients gain or retain competitive edge for long time.

## **6. Application Maintenance:**

Application maintenance is the most critical part of any business. As needs for business change constantly, application deployed to manage business also needs to accommodate business changes as well as additional features are required to be developed. Over the time, we have developed process which understands importance of critical business applications, thus WEBEE TECHNOLOGY assists you not only in customized application development but also maintaining them which ensures smooth operations and reduces the cost of redeveloping and redeploying applications. Service included in our maintenance:

Risk analysis systems

1. New features implementation
2. Configuration Management
3. Troubleshooting and bug fixing
4. Performance management
5. Change implementation, code review and testing
6. Improving business process efficiency
7. Increased growth in terms of top line as well as bottom line
8. Use of legacy applications over the internet
9. Monitoring and improving workforce productivity
10. Better client relationship and lower client support

## **7. Mission, Vision & Value:**

### **1. Mission:**

- a. To lead in the various avenues of Software Outsourcing market, implement novel ideas in project development and deliver cost effective and required solutions to its prospective clients.
